

Hauling, Distribution & Beneficial Reuse of Biosolids

Class A, Class AA, Class B, and Raw Biosolids

Revinu and our associated companies have over 25 years of experience in the hauling and distribution of Biosolids. We are available to haul to customer directed landsites or arrange for safe distribution at landsites we have already contracted with. Revinu provides clean quality equipment that conforms to all local and federal DOT requirements. All of our trailers are equipped with leak proof tailgates/water tight bodies and tarp covers, and are kept in excellent working order through the Revinu Preventative Maintenance Program.

Safety and Preventative Maintenance

Revinu recognizes that proper training and safety help drive successful business and services. Our overall management program includes a comprehensive safety plan that is implemented on all projects including spill prevention and clean-up programs, as well as mobile repairs. Our mobile repair fleet is also available for dispatch at all times. These services, combined with our Preventative Maintenance Program, offer you a worry free service for all hauling of your hauling needs.

Biosolids Management

Revinu, Inc. has formed a specialized team to provide the best service possible for most biosolids management projects

We have successfully provided operations, including the distribution of millions of wet tons of Class A/AA material, Class B land application, dewatering, transportation and marketing services, to multiple municipalities. Our philosophy is to provide services that will not only benefit our communities but society as a whole.

Revinu, Inc. owns equipment utilizing the Schwing Bioset process to produce Class A/AA biosolids and offers mobile services for this technology. Additionally, Revinu, Inc. owns and operates equipment that dewateres liquid biosolids. This dewatered product can then either be further processed to a Class B or Class A/AA product, or be hauled away and safely distributed and re-purposed.

Revinu's approach is proven and successful as demonstrated by our history, which includes 25+ years of biosolids hauling and disposal, Class A/AA production, mobile dewatering, mobile Class A/AA operations, land management, soil enhancement, fertilizer sales, and equipment leasing.

Our team of experts is unique and it includes Beneficial Reuse Consultants, Product Managers, Project Managers, Permitting Specialists, Environmental Specialists, Mechanics, Haulers, and Operations Personnel.
